

MALLIDI ABHIRAM MANIKANTA REDDY

☎ 8121548304 | ✉ 2400040026ecehte@gmail.com | 🔗 LinkedIn | 📍 Vijayawada, India

CAREER OBJECTIVE

I am a detail-oriented **VLSI Engineer** with a strong foundation in digital electronics, semiconductor technology, and integrated circuit design principles. I have experience with hardware description languages such as Verilog and VHDL, and I am familiar with concepts like RTL design, digital logic design, simulation, and verification. I am passionate about designing efficient, scalable, and reliable chip solutions. I am eager to apply my technical skills and problem-solving abilities to develop innovative semiconductor systems while continuously improving my expertise in the VLSI domain.

EDUCATION

B.Tech in Electrical and Electronics Engineering <i>K L University CGPA: 9.26 / 10</i>	2024 – Present
Senior Secondary Education (Class XII) <i>Adity Junior College Score: 903/1000</i>	2022 – 2024
Secondary Education (Class X) <i>Bhashyam High Schools Score: 461/600</i>	2021 – 2022

TECHNICAL SKILLS

Languages : Verilog , C, C++, Python, HTML

VLSI Tools : Siemens EDA , Itspice, vivado

Development Tools : Pycham, Google Collabe, VS Code, Google Analytics, GitHub

SOFT SKILLS

Creativity

Problem Solving

Attention to Detail

Communication

Collaboration

Time Management

Adaptability

PROJECTS

Smart Attendance System (Hardware-Based)

- Developed a Smart Attendance System to automatically record and manage student attendance.
- Reduced manual effort and improved accuracy by implementing automated real-time attendance tracking.

Automatic Parking Allocation System (Hardware-Based)

- Developed an **Automatic Parking Allocation System** to assign available parking slots automatically and reduce parking search time.
- Improved parking management by detecting free spaces and guiding vehicles to the nearest available slot.

Smart Agricultural Value Added Marketplace (Web Application)

- Developed a web-based **Smart Agricultural Value-Added Marketplace** using **Django** to help farmers sell value-added agricultural products directly to buyers without middlemen.
- Implemented features like product listing, inventory management, order tracking, feedback system, and an admin dashboard for efficient marketplace management.

ADDITIONAL INFORMATION

- Strong interest in VLSI design, semiconductor technology, and digital integrated circuit development.
- Actively building hardware projects using **Verilog** and tools like **Xilinx Vivado**.
